

Project Presentation Guidelines

The presentation should have a duration of **10–20 minutes** and must comprehensively address how your project fulfills each specified requirement.

Approach the presentation as if you are pitching your project to potential investors, with the goal of persuading them to support your initiative. The following elements should be included in your presentation:

- A detailed explanation of your project plan, including how you intend to achieve your objectives.
- An overview of the development tools you will utilize.
- A description of any additional features or specifications you plan to incorporate.
- A clear articulation of why you are passionate about this project and the market need it aims to address.

Important: The presentation must be delivered using slides.
